

Department of Energy

§ 603.895

the contracting officer must include provisions in a TIA that addresses foreign access to technology developed under the TIA.

(b) A provision must provide, as a minimum, that any transfer of the technology must be consistent with the U.S. export laws, regulations and the Department of Commerce Export Regulation at Chapter VII, Subchapter C, Title 15 of the CFR (15 CFR parts 730–774), as applicable.

(c) A provision should also provide that any products embodying, or produced through the use of, any created intellectual property, will be manufactured substantially in the United States, and that any transfer of the right to use or sell the products must, unless the Government grants a waiver, require that the products will be manufactured substantially in the United States. In individual cases, the contracting officer, with the approval of the program official and intellectual property counsel, may waive or modify the requirement of substantial manufacture in the United States at the time of award, or subsequent thereto, upon a showing by the recipient that:

(1) Alternative benefits are being secured for the United States taxpayer (*e.g.*, increased domestic jobs notwithstanding foreign manufacture);

(2) Reasonable but unsuccessful efforts have been made to transfer the technology under similar terms to those likely to manufacture substantially in the United States; or

(3) Under the circumstances domestic manufacture is not commercially feasible.

FINANCIAL AND PROGRAMMATIC REPORTING

§ 603.880 Reports requirements.

A TIA must include requirements that, as a minimum, provide for periodic reports addressing program performance and, if it is an expenditure-based award, business/financial status. The contracting officer must require submission of the reports at least annually, and may require submission as frequently as quarterly (this does not preclude a recipient from electing to submit more frequently than quarterly the financial information that is re-

quired to process payment requests if the award is an expenditure-based TIA that uses reimbursement or advance payments under § 603.810(a)). The requirements for the content of the reports are as follows:

(a) The program portions of the reports must address progress toward achieving performance goals and milestones, including current issues, problems, or developments.

(b) The business/financial portions of the reports, applicable only to expenditure-based awards, must provide summarized details on the status of resources (federal funds and non-federal cost sharing), including an accounting of expenditures for the period covered by the report. The report should compare the resource status with any payment and expenditure schedules or plans provided in the original award; explain any major deviations from those schedules; and discuss actions that will be taken to address the deviations. The contracting officer may require a recipient to separately identify in these reports the expenditures for each participant in a consortium and for each programmatic milestone or task, if the contracting officer, after consulting with the program official, judges that those additional details are needed for good stewardship.

§ 603.885 Updated program plans and budgets.

In addition to reports on progress to date, a TIA may include a provision requiring the recipient to annually prepare an updated technical plan for future conduct of the research effort and a revised budget if there is a significant change from the initial budget.

§ 603.890 Final performance report.

A TIA must require a final performance report that addresses all major accomplishments under the TIA.

§ 603.895 Protection of information in programmatic reports.

If a TIA is awarded under the authority of 42 U.S.C. 7256(g) (*i.e.*, it is a type of assistance transaction “other than” a contract, grant or a cooperative agreement), the contracting officer may inform a participant that the award is covered by a special protected
